ORDER:-

In the reference read above, the E-in-C (R&B) State Roads, Hyd., has stated that during the monsoon season of 2005, 2009 and 2010 the excess water from Murike Nala and the local tank water over flown over the road due to insufficient vent way of the culvert. The existing culvert was constructed long back for the drainage water flow. During course of time the discharge have increased due to Murki Nala flowing in to this inlet. The existing vent way of the culvert is only 1.20 mt and is not sufficient to discharge the entire water coming from the nala. The Upstream side section and Down Stream section of the NALA is of 6.00 mts width. The inflow is restricted at this culvert which is coming through the NALA of 6.00mts width. Hence, the C.D work is proposed with I vent of 6.00 mts. Span Box Culvert. The Hon'ble MLA Chandrayangutta has also represented to increase the vent of the present narrow culvert as the water is flowing over the road and obstructing traffic during rains. The ENC (R&B), SR. Hyd has certified that the Stage – I approval is not required as detailed investigation is completed and designs are finalized. No land acquisition and shifting of utilities are required for taking up the subject work without interruption. The ENC (R&B),SR. Hyderabad has requested to accord administrative sanction of Rs. 2.40 Crores for the work of Reconstruction of Narrow Minor Bridge 1 V of 6.00 m span (Box Culvert Single Cell 6.00 X 2.92) at Km 16/2-4 on Inner Ring Road in Ranga Reddy District under Plan- MDR for the year 2012-13.
